

# Placing and restoring ... ... your First Implant!

**Learn to place and restore a dental implant... in abundant bone! !**

This unique Friday/Saturday hands-on course with models, will review every aspect of treatment planning needed to place and restore a dental implant in areas with abundant bone. This unique protocol is CT Scan based, uses a surgical guide, and does not require any prior surgical experience. The course handout defines all instruments and materials needed for this protocol. Course fee includes the doctor bringing one staff member to train for better implementation back at your office. **Attendance is Limited to 25 Doctors!**
